

# Being Safe!

**CAUTION**

## What Is Safety?

Safety is the condition of being protected from or unlikely to cause danger, risk or injury.

Being safe is always important but what does safety actually mean, everyone can view the term safety very differently. Safety is about making sure you and your friends are not at risk or in danger.

## Where to get help?

## Tips On Keeping Safe!

**SAFETY FIRST!**

**Tips on keeping you and your future self-safe.**

If your gut instinct is telling you something is not right, **GET OUT OF THERE** & speak to an adult you trust.

Get your own drink and keep it with you at all times.

Do not mix alcohol and drugs together as this can be **EXTREMELY DANGEROUS** and can make you more **VULNERABLE**.

Always inform someone you trust (preferably an adult) of where you are and give them an estimated time of when you will be back.

Always keep your phone in charge, turned on and in credit. **IF IN DOUBT WRITE A NUMBER ON YOUR HAND!**

Set up a trusted adults number as an emergency contact in your phone.

Always know how you are getting home (pre-book a taxi or arrange someone to pick you up at a set time). Never get in a car with someone who is under the influence.

Never walk home alone, with someone you have just met or do not fully trust.

Know your limits and stick to them! **NEVER DO OR TAKE SOMETHING YOU DON'T WANT TO.**

Set up a drunk lock on your phone – it will save the embarrassment of dodgy texts, pictures and Facebook posts.

Never take drinks, vapes or anything from someone you do not know or don't fully trust.

# Big Guide to Safety

# Partied Too Much?

## Something Gone Wrong?

### Warning Signs Of Alcohol Poisoning:

- Pale, Bluish & Clammy Skin
- Blue Lips
- Confusion
- Unusual (too fast/too slow) Or Irregular Heartbeat/Pulse
- Unusual Temperature (too hot / too cold)
- Unusual Breathing (too fast/too slow) Or Breathing Difficulties
- Numbness In Arms & Legs

### You Should:

- Attempt to keep them awake and sitting up if possible
- Talk to them and reassure them
- Give them small sips of water but ONLY if they are able to drink it
- Stay with them and monitor the situation
- Try to keep them as comfortable as possible

Ensure you call for help from a trusted adult.

if in doubt CALL FOR AN AMBULANCE!

### If They Are:

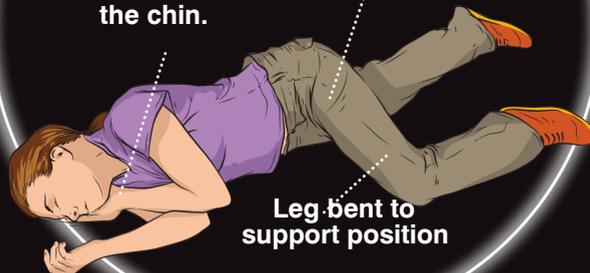

- Passed out & won't wake up
- Passed out and/or being sick
- Not responding in any way

**PUT THEM IN RECOVERY POSITION & CALL FOR AN AMBULANCE!**

### THE RECOVERY POSITION

Open their airways by tilting the head back and placing their hand under the chin.

Place the person on their side with their arm bent - to prevent them rolling over.

**"IT'S ALWAYS BETTER TO BE SAFE THAN SORRY"**

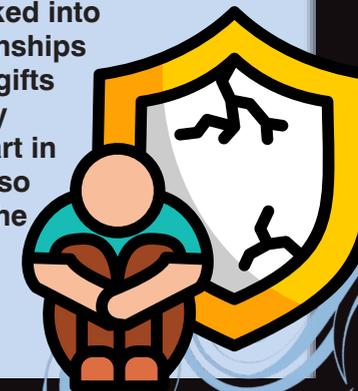

## Vulnerability

Using drugs and/or alcohol can make a person more vulnerable. Vulnerable means being exposed to the possibility of being attacked or harmed, whether it be emotionally or physically.

Alcohol and drugs sometimes can play a big part in the abuse of children and young people. They might be invited to parties with older people, where drugs and alcohol are used. Sometimes children and young people are tricked into believing they are in loving, consensual relationships and friendships. They may be given items and gifts such as alcohol, cigarettes, drugs, food, money etc. in order for them to perform and/or take part in sexual acts. Children and young people may also be persuaded to send sexual images through the use of the technology and the internet.
